Module 3 Quiz

TOTAL POINTS 7

Οi	AL POINTS /	
•	You are given a dataset on movie reviews with a 1,000 labeled reviews. The labels are one of five movie genres: Action, Comedy, Drama, Horror, and Sci-Fi. The dataset has roughly 200 movie reviews for each movie genre.	1 point
	Your first task is to learn a supervised classifier to identify just the reviews for Comedy movies from the dataset. Such a task is:	
	 Single-class classification 	
	Two-class (Binary) classification	
	Multi-class classification	
	Multi-label classification	
	The dataset available for the first task is:	1 point
	Balanced	
	Insufficient	
	Skewed	
	Unlabeled	
3.	Suppose you decide to train a support vector machine classifier for this first task. The methodology you will employ will be a:	1 point
	A. One vs One classifier	
	B. One vs Rest classifier	
	C. Single binary classifier	
	C Either A or B	
	Classifier cannot be trained	
	You are given a dataset on movie reviews with a 1,000 labeled reviews. The labels are one of five movie genres: Action, Comedy, Drama, Horror, and Sci-Fi. The dataset has roughly 200 movie reviews for each movie genre.	1 point
	Your second task is to learn to identify all five movie genres. Such a task is:	
	Single-class classification	
	Two-class (Binary) classification	
	Multi-class classification	
	Multi-label classification	
· •	The dataset available for the second task is:	1 point
	Balanced	
	Insufficient	
	Skewed	
	Unbalanced	
·.	Suppose you decide to train a support vector machine classifier for the second task. The methodology you will employ will be a:	1 point
	A. One vs One classifier	
	B. One vs Rest classifier C. Single five slass classifier	
	C. Single five-class classifier	
	Either A or B	
	Classifier cannot be trained	
	How many binary classifiers will you need to train for the second task using the one-vs-rest classification approach?	1 point
	540	
	10	
	25
